

## AUTHOR INDEX for Volumes 17 and 18

- J. Andres and A. M. Bersani, *Almost-Periodicity Problem as a Fixed-Point Problem for Evolution Inclusions*, **18**, 337–349.
- F. Antoci and M. Prizzi, *Reaction-Diffusion Equations on Unbounded Thin Domains*, **18**, 283–302.
- J. Appel, M. Văth and A. Vignoli,  *$\mathcal{F}$ -epi Maps*, **18**, 373–393.
- P. Ashwin, X.-C. Fu, W. Lu and J. Duan, *Symbolic Representations of Iterated Maps*, **18**, 119–147.
- R. Bader, M. Kamenskii and V. Obukhovskii, *On Some Classes of Operator Inclusions with Lower Semicontinuous Nonlinearities*, **17**, 143–156.
- I. Beg, *Inequalities in Metric Spaces with Applications*, **17**, 183–190.
- V. Benci, A. M. Micheletti and D. Visetti, *An Eigenvalue Problem for a Quasilinear Elliptic Field Equation on  $\mathbb{R}^n$* , **17**, 191–211.
- A. M. Bersani and J. Andres, *Almost-Periodicity Problem as a Fixed-Point Problem for Evolution Inclusions*, **18**, 337–349.
- A. Canino, *On the Existence of Three Solutions for Jumping Problems Involving Quasilinear Operators*, **18**, 1–16.
- M. C. Carbinatto and K. P. Rybakowski, *Morse Decompositions in the Absence of Uniqueness*, **18**, 205–242.
- Y. Choquet-Bruhat and J. W. York, *On H. Friedrich's Formulation of the Einstein Equations with Fluid Sources*, **18**, 321–335.
- M. Chraïbi Kaadoud, *Résolution de Problèmes de Raflé et Application à un Problème de Frottement*, **18**, 89–102.
- M. Clapp and G. Izquierdo, *Multiple Positive Symmetric Solutions of a Singularly Perturbed Elliptic Equation*, **18**, 17–39.
- F. Colin, *Hardy's Inequality in Unbounded Domains*, **17**, 277–284.
- G. Colombo and V. V. Goncharov, *Continuous Selections via Geodesics*, **18**, 171–182.
- J.-N. Corvellec, *On the Second Deformation Lemma*, **17**, 55–66.
- V. Coti Zelati and P. H. Rabinowitz, *Heteroclinic Solutions Between Stationary Points at Different Energy Levels*, **17**, 1–21.
- T. D'Aprile, *Existence and Concentration of Local Mountain Passes for a Nonlinear Elliptic Field Equation in the Semi-Classical Limit*, **17**, 239–275.
- J. Duan, X.-C. Fu, W. Lu and P. Ashwin, *Symbolic Representations of Iterated Maps*, **18**, 119–147.
- V. Ďurikovič and M. Ďurikovičová, *Sets of Solutions of Nonlinear Initial-Boundary Value Problems*, **17**, 157–182.
- M. Ďurikovičová and V. Ďurikovič, *Sets of Solutions of Nonlinear Initial-Boundary Value Problems*, **17**, 157–182.
- M. A. Efendiev and W. L. Wendland, *Nonlinear Riemann–Hilbert Problems for Doubly Connected Domains and Closed Boundary Data*, **17**, 111–124.
- M. Frigon, *On a Generalized Critical Point Theory on Gauge Spaces and Applications to Elliptic Problems on  $\mathbb{R}^N$* , **17**, 67–89.
- X.-C. Fu, W. Lu, P. Ashwin and J. Duan, *Symbolic Representations of Iterated Maps*, **18**, 119–147.

- V. V. Goncharov and G. Colombo, *Continuous Selections via Geodesics*, **18**, 171–182.
- Z. Guo, *Structure of Large Positive Solutions of Some Semilinear Elliptic Problems where the Nonlinearity Changes Sign*, **18**, 41–71.
- N. Hirano, *Multiplicity of Solutions for Nonhomogeneous Nonlinear Elliptic Equations with Critical Exponents*, **18**, 269–281.
- G. Isac, *Leray–Schauder Type Alternatives and the Solvability of Complementarity Problems*, **18**, 191–204.
- G. Izquierdo and M. Clapp, *Multiple Positive Symmetric Solutions of a Singularly Perturbed Elliptic Equation*, **18**, 17–39.
- T. Kaczynski, *Recursive Coboundary Formula for Cycles in Acyclic Chain Complexes*, **18**, 351–371.
- M. Kamenskii, R. Bader and V. Obukhovskii, *On Some Classes of Operator Inclusions with Lower Semicontinuous Nonlinearities*, **17**, 143–156.
- N. Karachalios and N. Stavrakakis, *Asymptotic Behavior of Solutions of Some Nonlinearly Damped Wave Equations on  $\mathbb{R}^N$* , **18**, 73–87.
- B. Kamierczak, *Existence of Travelling Wave Solutions for Reaction-Diffusion-Convection Systems via the Conley Index Theory*, **17**, 359–403.
- M. Kisielewicz, *Weak Compactness of Solution Sets to Stochastic Differential Inclusions with Convex Right-Hand Sides*, **18**, 149–169.
- S. Lancelotti, *Nontrivial Solutions of Variational Inequalities. The Degenerate Case*, **18**, 303–319.
- W. Lu, P. Ashwin, X.-C. Fu and J. Duan, *Symbolic Representations of Iterated Maps*, **18**, 119–147.
- A. Marino and C. Saccon, *Nabla Theorems and Multiple Solutions for Some Noncooperative Elliptic Systems*, **17**, 213–237.
- A. M. Micheletti, V. Benci and D. Visetti, *An Eigenvalue Problem for a Quasilinear Elliptic Field Equation on  $\mathbb{R}^n$* , **17**, 191–211.
- D. Miklaszewski, *A Fixed Point Theorem for Multivalued Mappings with Nonacyclic Values*, **17**, 125–131.
- D. Mugnai, *On a “Reversed” Variational Inequality*, **17**, 321–357.
- O. Nakoulima, A. Omrane and J. Velin, *A Nonlinear Problem for Age-Structured Population Dynamics with Spatial Diffusion*, **17**, 307–319.
- V. Obukhovskii, R. Bader and M. Kamenskii, *On Some Classes of Operator Inclusions with Lower Semicontinuous Nonlinearities*, **17**, 143–156.
- V. Obukhovskii and T. Starova, *On Stability of Fixed Point of Multivalued Maps*, **17**, 133–141.
- A. Omrane, O. Nakoulima and J. Velin, *A Nonlinear Problem for Age-Structured Population Dynamics with Spatial Diffusion*, **17**, 307–319.
- P. G. Papadopoulos and N. M. Stavrakakis, *Global Existence and Blow-Up Results for an Equation of Kirchhoff Type on  $\mathbb{R}^N$* , **17**, 91–109.
- J. Pejsachowicz, *Index Bundle, Leray–Schauder Reduction and Bifurcation of Solutions of Nonlinear Elliptic Boundary Value Problems*, **18**, 243–267.
- B. Pellacci, *Critical Points for Some Functionals of the Calculus of Variations*, **17**, 285–305.
- M. Prizzi and F. Antoci, *Reaction-Diffusion Equations on Unbounded Thin Domains*, **18**, 283–302.

- P. H. Rabinowitz and V. Coti Zelati, *Heteroclinic Solutions Between Stationary Points at Different Energy Levels*, **17**, 1–21.
- S. Reich and A. J. Zaslavski, *Well-Posedness and Porosity in Best Approximation Problems*, **18**, 395–408.
- K. P. Rybakowski and M. C. Carbinatto, *Morse Decompositions in the Absence of Uniqueness*, **18**, 205–242.
- C. Saccon and A. Marino, *Nabla Theorems and Multiple Solutions for Some Noncooperative Elliptic Systems*, **17**, 213–237.
- M. Squassina, *On the Existence of Positive Entire Solutions of Nonlinear Elliptic Equations*, **17**, 23–39.
- T. Starova and V. Obukhovskii, *On Stability of Fixed Point of Multivalued Maps*, **17**, 133–141.
- N. Stavrakakis and N. Karachalios, *Asymptotic Behavior of Solutions of Some Nonlinearly Damped Wave Equations on  $\mathbb{R}^N$* , **18**, 73–87.
- N. M. Stavrakakis and P. G. Papadopoulos, *Global Existence and Blow-Up Results for an Equation of Kirchhoff Type on  $\mathbb{R}^N$* , **17**, 91–109.
- G. Vannella, *Morse Theory Applied to a  $T^2$ -Equivariant Problem*, **17**, 41–53.
- M. V  th, J. Appel and A. Vignoli,  *$\mathcal{F}$ -epi Maps*, **18**, 373–393.
- J. Velin, O. Nakoulima and A. Omrane, *A Nonlinear Problem for Age-Structured Population Dynamics with Spatial Diffusion*, **17**, 307–319.
- A. Vignoli, J. Appel and M. V  th,  *$\mathcal{F}$ -epi Maps*, **18**, 373–393.
- D. Visetti, V. Benci and A. M. Micheletti, *An Eigenvalue Problem for a Quasilinear Elliptic Field Equation on  $\mathbb{R}^n$* , **17**, 191–211.
- S. Walczak, *Variational and Boundary Value Problems with Perturbations*, **18**, 103–118.
- W. L. Wendland and M. A. Efendiev, *Nonlinear Riemann–Hilbert Problems for Doubly Connected Domains and Closed Boundary Data*, **17**, 111–124.
- D. Wilczak, *Computer Assisted Proof of Chaotic Dynamics in the R  ssler Map*, **18**, 183–190.
- J. W. York and Y. Choquet-Bruhat, *On H. Friedrich’s Formulation of the Einstein Equations with Fluid Sources*, **18**, 321–335.
- A. J. Zaslavski and S. Reich, *Well-Posedness and Porosity in Best Approximation Problems*, **18**, 395–408.
