CORRECTIONS TO "STABLE MAPS
OF GENUS ZERO TO FLAG SPACES"
(TOPOL. METHODS NONLINEAR ANAL. 11 (1998), 207–217)

Yuri I. Manin

---

(1) Divide the left hand side of (2.3) by [PGL(2)]. The same in the unnumbered formula several lines after (2.11) preceding the sentence "which is (2.3)".

(2) Divide by $[W]$ the left hand side of the unnumbered formula following (2.11). Divide by $P_W(q)$ the left hand side of (2.13) and (2.17).

(3) Divide the left hand side of (2.12) by $q^2(q^4 - 1)$.

(4) Replace (2.15) by

$$(2.15) \qquad (1 + q^2 t - q^2 \psi)\psi_t = 1 + \psi.$$

(5) Replace (2.16) by

$$(1 + t + \varphi^0)\log(1 + t + \varphi^0) = 2\varphi^0 + t - X(1 + t + \varphi^0),$$
$$(2.16) \qquad X = \frac{1}{q^2 - 1}\left(\frac{E(W, z)}{P_W(q)} - 1\right)\bigg|_{q^2 = 1}.$$

I thank Nikita Nekrasov who altered me to these mistakes.
