

AUTHOR INDEX for Volumes 15 and 16

- S. M. Ageev and D. Repovš, *On Selection Theorems with Decomposable Values*, **15**, 385–399.
- A. Andreini, M. Kamenskii and P. Nistri, *A Result on the Singular Perturbation Theory for Differential Inclusions in Banach Spaces*, **15**, 1–15.
- J. Andres, L. Górniewicz and J. Jezierski, *Relative Versions of the Multivalued Lefschetz and Nielsen Theorems and their Application to Admissible Semi-Flows*, **16**, 73–92.
- Q. H. Ansari, A. Idzik and J.-Ch. Yao, *Coincidence and Fixed Point Theorems with Applications*, **15**, 191–202.
- G. Bartuzel and A. Fryszkowski, *Stability of Principal Eigenvalue of the Schrödinger Type Problem for Differential Inclusions*, **16**, 181–194.
- P. Benevieri and M. Furi, *On the Concept of Orientability for Fredholm Maps Between Real Banach Manifolds*, **16**, 279–306.
- S. Bezuglyi and J. Kwiatkowski, *The Topological Full Group of a Cantor Minimal System is Dense in the Full Group*, **16**, 371–397.
- W. M. Bian, *Solutions of Implicit Evolution Inclusions with Pseudo-Monotone Mappings*, **15**, 101–113.
- I. Birindelli and J. Giacomoni, *Bifurcation Problems for Superlinear Elliptic Indefinite Equations*, **16**, 17–36.
- M. C. Carbinatto and K. P. Rybakowski, *Conley Index Continuation and Thin Domain Problems*, **16**, 201–251.
- A. Cernea, *Some Topological Properties of a Nonconvex Integral Inclusion*, **15**, 33–41.
- F. Şt. Ciurtea and V. D. Rădulescu, *Multiple Solutions of Degenerate Perturbed Elliptic Problems Involving a Subcritical Sobolev Exponent*, **15**, 283–300.
- M. M. Coclite, *Positive Solutions of a Hammerstein Integral Equation with a Singular Nonlinear Term*, **15**, 235–250.
- E. C. M. Crooks, *Stability of Travelling-Wave Solutions for Reaction-Diffusion-Convection Systems*, **16**, 37–63.
- Z. Denkowski, *Existence and Relaxation Problems in Optimal Shape Design*, **16**, 161–180.
- A. Fryszkowski and G. Bartuzel, *Stability of Principal Eigenvalue of the Schrödinger Type Problem for Differential Inclusions*, **16**, 181–194.
- M. Furi and P. Benevieri, *On the Concept of Orientability for Fredholm Maps Between Real Banach Manifolds*, **16**, 279–306.
- D. Gabor and W. Kryszewski, *A Coincidence Theory Involving Fredholm Operators of Nonnegative Index*, **15**, 43–59.
- G. Gabor and R. Pietkun, *Periodic Solutions of Differential Inclusions with Retards*, **16**, 103–123.
- J. Giacomoni and I. Birindelli, *Bifurcation Problems for Superlinear Elliptic Indefinite Equations*, **16**, 17–36.
- E. Glasner, *Quasifactors of Minimal Systems*, **16**, 351–370.
- Yu. E. Gliklikh, *Total and Local Topological Indices for Maps of Hilbert and Banach Manifolds*, **15**, 17–31.

- S. V. Grigorieva and V. N. Ushakov, *Use Finite Family of Multivalued Maps for Constructing Stable Absorption Operator*, **15**, 75–89.
- L. Górniewicz, J. Andres and J. Jezierski, *Relative Versions of the Multivalued Lefschetz and Nielsen Theorems and their Application to Admissible Semi-Flows*, **16**, 73–92.
- A. Idzik, Q. H. Ansari and J.-Ch. Yao, *Coincidence and Fixed Point Theorems with Applications*, **15**, 191–202.
- M. Izydorek and W. Marzantowicz, *The Borsuk–Ulam Property for Cyclic Groups*, **16**, 65–72.
- M. Izydorek and A. Vidal, *An Example Concerning Equivariant Deformations*, **15**, 187–190.
- J. Jachymski, *A Short Proof of the Converse to the Contraction Principle and Some Related Results*, **15**, 179–186.
- J. Jezierski, J. Andres and L. Górniewicz, *Relative Versions of the Multivalued Lefschetz and Nielsen Theorems and their Application to Admissible Semi-Flows*, **16**, 73–92.
- M. Kamenskii, A. Andreini and P. Nistri, *A Result on the Singular Perturbation Theory for Differential Inclusions in Banach Spaces*, **15**, 1–15.
- J. Kapeluszny and T. Kuczumow, *A Few Properties of the Kobayashi Distance and Their Applications*, **15**, 169–177.
- W. Kryszewski and D. Gabor, *A Coincidence Theory Involving Fredholm Operators of Nonnegative Index*, **15**, 43–59.
- T. Kuczumow and J. Kapeluszny, *A Few Properties of the Kobayashi Distance and Their Applications*, **15**, 169–177.
- P. Lavilledieu and A. Seeger, *Eigenvalue Stability for Multivalued Operators*, **15**, 115–128.
- V. K. Le, *A Global Bifurcation Result for Quasilinear Elliptic Equations in Orlicz–Sobolev Spaces*, **15**, 301–327.
- C.-Y. Lin, *Cauchy Problems and Applications*, **15**, 359–368.
- Yu. I. Manin, *Stable Maps of Genus Zero to Flag Spaces*, **11**, 207–217; Errata **15**, 401.
- W. Marzantowicz and M. Izydorek, *The Borsuk–Ulam Property for Cyclic Groups*, **16**, 65–72.
- S. Migórski, *Existence and Convergence Results for Evolution Hemivariational Inequalities*, **16**, 125–144.
- L. Mikojaczyk and M. Studniarski, *Higher-Order Necessary Optimality Conditions for Extremum Problems in Topological Vector Spaces*, **15**, 129–139.
- P. Nistri, A. Andreini and M. Kamenskii, *A Result on the Singular Perturbation Theory for Differential Inclusions in Banach Spaces*, **15**, 1–15.
- A. Nowakowski and A. Rogowski, *Dependence on Parameters for the Dirichlet Problem with Superlinear Nonlinearities*, **16**, 145–160.
- V. Obukhovskii and P. Rubbioni, *On a Controllability Problem for Systems Governed by Semilinear Functional Differential Inclusions in Banach Spaces*, **15**, 141–151.
- V. Obukhovskii and P. Zecca, *On Some Properties of Dissipative Functional Differential Inclusions in a Banach Space*, **15**, 365–384.

- A. Ochal, *Domain Identification Problem for Elliptic Hemivariational Inequalities*, **16**, 267–278.
- D. Papini and F. Zanolin, *A Topological Approach to Superlinear Indefinite Boundary Value Problems*, **15**, 203–233.
- S. Park, *The Knaster–Kuratowski–Mazurkiewicz Theorem and Almost Fixed Points*, **16**, 195–200.
- K. Perera and M. Schechter, *Multiple Nontrivial Solutions of Elliptic Semilinear Equations*, **16**, 1–15.
- R. Pietkun and G. Gabor, *Periodic Solutions of Differential Inclusions with Retards*, **16**, 103–123.
- S. Plaskacz and M. Quincampoix, *Discontinuous Mayer Control Problem Under State-Constraints*, **15**, 91–100.
- A. Rogowski and A. Nowakowski, *Dependence on Parameters for the Dirichlet Problem with Superlinear Nonlinearities*, **16**, 145–160.
- V. D. Rădulescu and F. Șt. Cîrstea, *Multiple Solutions of Degenerate Perturbed Elliptic Problems Involving a Subcritical Sobolev Exponent*, **15**, 283–300.
- S. Reich and A. J. Zaslavski, *Infinite Products of Resolvents of Accretive Operators*, **15**, 153–168.
- D. Repovš and S. M. Ageev, *On Selection Theorems with Decomposable Values*, **15**, 385–399.
- P. Rubbioni and V. Obukhovskii, *On a Controllability Problem for Systems Governed by Semilinear Functional Differential Inclusions in Banach Spaces*, **15**, 141–151.
- K. P. Rybakowski and M. C. Carbinatto, *Conley Index Continuation and Thin Domain Problems*, **16**, 201–251.
- M. Quincampoix and S. Plaskacz, *Discontinuous Mayer Control Problem Under State-Constraints*, **15**, 91–100.
- M. Schechter and K. Perera, *Multiple Nontrivial Solutions of Elliptic Semilinear Equations*, **16**, 1–15.
- V. Šeda, *A Remark to the Schauder Fixed Point Theorem*, **15**, 61–73.
- V. Šeda, *R_δ -Set of Solutions to a Boundary Value Problem*, **16**, 93–101.
- A. Seeger and P. Lavilledieu, *Eigenvalue Stability for Multivalued Operators*, **15**, 115–128.
- J. Shi, *Blow Up Points of Solution Curves for a Semilinear Problem*, **15**, 251–266.
- T. Shibata, *Multiple Interior Layers of Solutions to Perturbed Elliptic Sine–Gordon Equation on an Interval*, **15**, 329–357.
- M. Studniarski and L. Mikojaczyk, *Higher-Order Necessary Optimality Conditions for Extremum Problems in Topological Vector Spaces*, **15**, 129–139.
- V. N. Ushakov and S. V. Grigorieva, *Use Finite Family of Multivalued Maps for Constructing Stable Absorption Operator*, **15**, 75–89.
- M. Văth, *An Axiomatic Approach to a Coincidence Index for Noncompact Function Pairs*, **16**, 307–338.
- A. Vidal and M. Izydorek, *An Example Concerning Equivariant Deformations*, **15**, 187–190.
- A. Wiszniewska–Matyszkiewicz, *Existence of Pure Equilibria in Games with Nonatomic Space of Players*, **16**, 339–349.

- J.-Ch. Yao, Q. H. Ansari and A. Idzik, *Coincidence and Fixed Point Theorems with Applications*, **15**, 191–202.
- F. Zanolin and D. Papini, *A Topological Approach to Superlinear Indefinite Boundary Value Problems*, **15**, 203–233.
- A. J. Zaslavski and S. Reich, *Infinite Products of Resolvents of Accretive Operators*, **15**, 153–168.
- P. Zecca and V. Obukhovskii, *On Some Properties of Dissipative Functional Differential Inclusions in a Banach Space*, **15**, 365–384.
- S. Zhou, *Attractor and Dimension for Discretization of a Damped Wave Equation with Periodic Nonlinearity*, **15**, 267–281.
- H. Żołądek, *The Topological Proof of Abel–Ruffini Theorem*, **16**, 253–265.
